

150,000 rpm

Machining on the Smallest Scale and High Speed Machining

Entering opening from \varnothing 12 mm,
rotational speed of up to 150,000 rpm

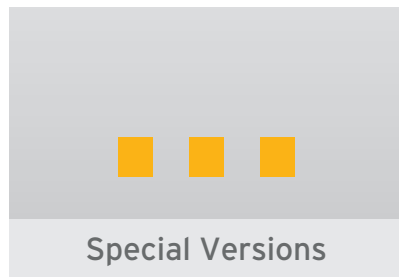

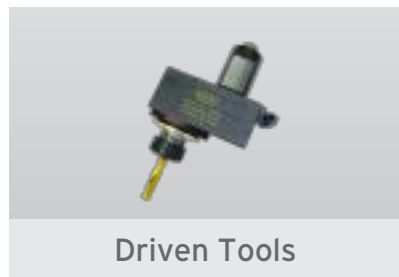

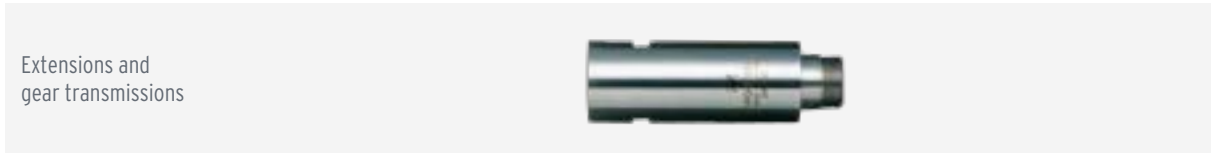

12 mm

- Drilling, milling, deburring, grinding, polishing, etc.
- Ideal for small machining centres
- Utilised for example in medical technology or precision mechanics
- Mechanical drive or air turbine
- Modular set-up for perfect adaptation to every kind of task

Mini Angular Heads
